

I'm trying to code an audio file. I need to save it in a bin/audio folder under the project. Where do I save this file? Do I save it in the same folder as the JAR file? Any help would be greatly appreciated. I'm very new to all this so the "how-to" would be very helpful. A: The usual way is

to put the mp3 file into resources folder and name it music.mp3. Then in your JAR file, you can reference this file with a Class-Resource property (or even an absolute path). `AudioFileFormat` has constructor that accepts `AudioInputStream`. This constructor has an example how to pass file from resources. Another option, of course, is use `getClass().getResourceAsStream("/path/to/file.mp3")` and pass that to `AudioFileFormat` constructor. //create file object, pass location of mp3 file, check if file was found

and created `AudioFile` file =

```
AudioFileFormat.open("audioFile.mp3",
AudioFileFormat.OM_MP3, audioInputStream); //check if
file was succesfully created if(file!= null) { //create output
stream, set format, write data to file AudioOutputStream
outputStream = new
AudioOutputStream(AudioFileFormat.OM_MP3,
file.getFormat(), audioOutputStream);
```

outputStream.write(sampleData, sampleData.length); } In the case of the physical collider, the (partially) integrated form of the function f is $\frac{\pi}{2} \theta^2 (1 + \cos \theta)$, which is of course symmetric. The Riemann-Stieltjes sums are $\frac{1}{n} \sum_{i=1}^n \{ \cos(\theta) + \sin(\theta) \}$ and are close to zero for θ close to 0 and π , and rapidly increasing for θ close to $\pi/2$. It is possible to do a similar analysis on the other quadrants, but the result is that the asymptotic behaviour is the same in all quadrants. Discussion ===== In this paper we have shown that the function

Paulo Ricardo was the leader of RPM, a pop/rock band that had great commercial success in Brazil. He left the band in 1989, when he recorded his first solo ... Paulo Ricardo was born on June 9, 1959, in Cuiaba, Mato Grosso, the son of JosÃ© Manuel Ricardo and Maria Aurica Danela. His sister is the singer and actress Claudia Ricardo. His mother was from Cuiaba and his father was from Parana. He began his musical career at the age of four, when he sang the song "Nada mas o apÃ³s o maior dia." His parents, JosÃ© Manuel Ricardo and Claudia Ricardo, both went to university and had several other children. At the age of six, he began learning the piano and guitar. fffad4f19a
