At any moment, the first snowmelt will cause.Q: AWS Cognito: How to access an attribute from Cognito using Boto3? I have a Cognito User Pool, within that pool I have created a Cognito Group, and within that group I have created a Cognito User. The attribute I wish to access from within my application is UserPoolId and its value is: "us-east-1:*****:cognito-idp:IDENTITYPOOL:group/groupName" I want to get that attribute value and use it within my application. How can I get it? I have been trying the following: conn = boto3.client('cognito-idp', region_name='us-east-1') f30f4ceada
