Playlist tracks from Windows Media Player are displayed on the iPOD panel in Windows Media Player 10. MP3s can be played from your iPod using the Sync button within Windows Media Player. Use the iTunes menu within Windows Media Player to manage your iPod and the tracks you have on it. Remove tracks from your iPod from within Windows Media Player. **Special Note: ** SyncAudio is not the same as iTunes Plugins and does not replicate iTunes. SyncAudio does not include the features of Plugins. ** SyncAudio does not perform media management as does iTunes.
