## What's New In Famous Screensaver?

Free Famous is a simple screensaver for your desktop which shows the names of famous people and characters. You can add more names to the list of available characters. There are also some basic functions. You can display the alphabet in any order you like, zoom in or out, rotate, start or pause the animations, or use the search function to filter the list of characters. Also, you can control the time between the letters falling down, the speed of falling letters, and several other settings. There is also a built-in graphic editor to customize the screensaver with your own images. You can use your own images, or use the built-in images to create a 3D animation or a still image. The interface is extremely simple, and you can select your favorite 3D effect and adjust the quality. When you are finished editing, you can save your work in a JPEG, GIF, BMP, TGA or PNG format. The images are stored in the library, so you can use them in many screensavers. There are dozens of options available for each effect. This screensaver works in Windows 2000, XP, Vista, 7, 8, and 10. It is possible to use it with other operating systems, but you will have to purchase it as a separate program. Credits: The Famous is the copyrighted product of Andreas Strandstorfer. It is completely free for personal use and is published under the GNU General Public License. You can download the screensaver at the link in the footer. If you want to publish the screensaver you have to send me a written authorization and the source code. If you are interested in such a license, send me a mail. Thank you for using this screen saver. It is one of my favorites. I hope that you will like it as well. Andreas What's New Version 1.0.12: - Fixed minor bug (screensaver with 2x larger text size than before) Version 1.0.11: - Fixed bug which caused the application to hang when you had set the time to "0:00" Version 1.0.10: - Fixed bug which caused the application to crash when you had opened the file dialog for the first time - Added an option to change the animation speed - Fixed bug with the filter mode which caused some of the buttons to disappear - Reorganized the menu and added a shortcut for pause/resume Version 1.0.9: - Added missing buttons for "Alphabet Order" - Added missing buttons for "Jump to name" - Fixed bug in the "duration" option (the date format was wrong) - Added a link to the Wikipedia page for the names from the list - Fixed bug in the "1 frame" option - Added a warning for the Windows firewall and the Office
