Drupal.org seems to take more than a year to include new features in these tags, and tags on related questions like "support" or "recommend" is not autocomplete, so I have to type them myself. I also noticed that, from the tags's page, it has the View All related tags and the related posts/questions list. But there is no list of all related tags, I am expecting something like when you click on any link: support debug log Is there any way to get this list automatically? A: 3da54e8ca3
